**No Job Too Big For
All American Logistics, LLC**

FEATURING A NEW LOOK & ALL NEW EDITORIAL!

NO JOB TOO BIG FOR ALL AMERICAN LOGISTICS, LLC

Most people who aren't in the trucking industry never give transportation a second thought. However, when you stop to think about what it takes to transport a load from origin to destination, most people don't realize that there's a lot more to it than what meets the eye.

All American Logistics owner, Debra Silver and her team of professionals, collectively have over 40 years of combined experience in the transportation industry. With all this experience under their belts, you might say they know how to get any shipment anywhere safely and economically for their customers.

All American Logistics specializes in transporting freight for Utility Companies and is familiar with transporting materials such as nuclear power plant components, solar panels, electrical transformers, poles of all material and size, wire reels of all sizes, circuit breakers, crated material, valves, pipe, LNG tanks and much more. The company is also known for its expertise in over dimensional freight and offers crane services. Hauling these types of loads requires more than a truck, a driver and some directions. AAL takes the burden of cautious handling and security clearances from their clients and follows the precious cargo step by step through the moving process. Debra reports, ***"We have a 98 percent on-time pick up and transit time record. All shipments are tracked from origin to destination. If there is an unforeseen delay, we remedy it for our clients."***

With the storms that have wreaked havoc on various areas of the country over the past years, Silver and her team have often found themselves an important step in the areas' rebuilding process. The company transports utility poles, pipes, cable and transformers at a moment's notice to get desperately needed supplies to devastated areas in need. AAL utilizes a vast network of experienced trucking companies and specialty certified owner operators. Flatbeds, vans, trailers with air-ride suspension, lowboys, step decks, 9 axle trailers, intermodal, and more are all part of the arsenal that All American has at its fingertips to service the needs of their clients.

The service doesn't stop with All American's clients. The All American Team believes in giving back to the community. The company supports education in the community by donating to schools in need. All American has also supported the Susan G. Komen Breast Cancer Foundation, The Leukemia & Lymphoma Society, Ronald McDonald House Charities, Relay for Life, as well as local schools and charities. Debra explained, ***"We believe it's the right thing to do. It's an opportunity to help others and I encourage our team to reach out and help where they can."***

All American Logistics, LLC is certified as a Woman Business Enterprise by the California Public Utilities Commission, (CPUC) and the Women's business Enterprise National Council (WBENC). PG&E Supplier of the Year, 2009; EPA SmartWay Partner.
